True North Automation Recognized as Great Place To Work® For Second Consecutive Year

Great Place to Work Canada® releases 2017 list of Best Workplaces.

Calgary, Alberta – For the second year in a row, True North Automation is extremely proud to be recognized as one of this year's Best Workplaces in Canada.

"True North's continued success is a direct result of our employees and maintaining their satisfaction is key to our growth in the future", says True North Automation President, Blair Hanel. "Investing in a workplace culture that makes our employees proud to be part of the True North team is part of what sets us apart from our competitors."

True North Automation realizes the importance of building culture and pride within the work place, and invests in this for our employees. Social activities, team building, and numerous social and family events make True North a workplace that allows a balance between work and family, and builds a sense of pride in the True North team. Our team carries this pride outside the work place, providing a high-level of service in all elements of our business. True North is proud to represent a Great Place to Work® not only internally, but also a Great Place to Work® with for our clients.

The 2017 Best Workplaces in Canada list is compiled by Great Place to Work® Institute Canada. The competition process is based on two criteria: confidential employee survey results and an in-depth review of the organization's culture. This offers a rigorous representation of the five trust-building dimensions of a Great Place to Work®: credibility, respect, fairness, pride, and camaraderie.

This year's list received over 400 registrations and over 60,000 employees participated in the 2017 "Best Workplaces in Canada" survey.

About True North Automation

True North Automation is a leading System Integration company in western Canada that employs a team of specialists in Automation and SCADA Integration; Electrical and Instrumentation Design; Telecommunications; Measurement; Data Management; Strategic Planning; Concept Design; Front End Engineering Design; Testing; Commissioning; and Start-Up Solutions.
